

The Gaggenau Magazine.

Edition 2010.

Dishwashing.

Gaggenau's professional dishwashers do the washing-up in the best possible manner – energy-saving, effectively and, above all, quietly. The DF 461 power dishwasher has more than earned the accolade of being “the world's fastest dishwasher”, needing a mere 59 minutes to wash and dry a full machine load. But there are also two other world firsts that are only available from Gaggenau – the Varioflex baskets ensure maximum flexibility with regard to the layout of the top and bottom baskets; Gaggenau has also developed the first smooth-running top basket with a fully extendable pull-out rack which makes light work of loading the dishwasher.

Power dishwasher DF 461.

Gaggenau is the only provider of dishwashers with a power function. With this function, the DF 461 can wash and dry a full load of dishes in just 59 minutes. The fastest appliance in the market.

- **Frontage:** The fully integrated appliance is entirely concealed behind the furniture panel.
- **Dimensions:** 60 cm wide; 86 cm high.
- **Varioflex baskets:** The folding spines, racks, the dividable glass holder and the dividable cutlery basket combine to ensure maximum flexibility with regard to the layout of the top and bottom baskets.
- **Fully extendable and smooth running baskets:** For convenient loading and emptying, even at the very back of the top basket.
- **Rackmatic:** Even when fully loaded, the height of the top basket is adjustable. This means that even bulky dishes can be placed in the bottom basket when the need arises.
- **Heat exchanger:** Fresh water is heated up by residual water. The drying cycle doesn't use any electricity. This alone saves 15% of energy.
- **Baking tray spray head:** To clean large objects, the baking tray spray head is attached to the back wall instead of the top basket. It comes with every dishwasher model.
- **Glass care technology:** Prevents large temperature fluctuations and compensates for varying levels of water hardness. Both factors are instrumental in preventing glasses from losing their sheen.
- **Automatic 3-in-1 detergent function:** To ensure sparkling results, the programme cycle adapts to suit the detergent.
- **Soften programme special function:** Heavily soiled dishes are pre-washed at a low temperature.
- **Aqua sensor:** Checks the cleanliness of the water after the pre-wash. If it's considered clean enough for the main cycle, the water will not be changed. This saves up to 4 litres of water.
- **Info-Light:** A tiny red light, which is projected on to the floor, signals that the dishwasher is running. Why? Because the appliance is so quiet and the control panel is deliberately not visible from the outside.
